HOUNDS GREATLY ANNOY SLEEPERS

To the Editor of the Argus
Dear Sir:
No doubt you, with hundreds of other residents of Ontario have been annoyed and deprived of sleep by the constant howling of a hound at night for hours at a stretch. Why should the sick, nervous, light sleeper be compelled to put up with such a nuisance. Suppose a man should nights hedious by getting out and howling so that all the town was disturbed, what would the authorities do? Declare it a nuisance, I guess and if continued lock him up. Why not the dog?
I saw one time an account of a man who kept fancy chickens. The roosters constantly crowed early in the morning, much to the annoyance of the neighbors. Complaint was entered and the man was ordered to suppress the nuisance. The man muzzled the rooster and stopped the nuisance. Why not muzzle the old sound?
Yours Truly,
ONE OF THE ANNOYED

REMINGTON UMC

Wetproof Steel Lined Shot Shells

A NOTED Pacific Coast sportsman who has hunted everything from snipe to black bear, said recently: "The water-proofing feature now offered sportsmen in Remington UMC 'Arrow' and 'Nitro Club' Wetproof Shotshells, is the most important improvement made in the shotshell field in over a decade. The men who perfected the Wetproof system certainly know shotgun shooting and its requirements from field, duck blind and traps, as well as from the scientific angle."

There is something that every man who lives in wet climate or does his shooting in the stormy seasons ought to know about.

These are the first completely wetproof shotshells ever and exclusive feature of the Remington UMC "Arrow" and "Nitro Club" Shotshells.

This is a process that took three years to perfect. It involved a deeper study of wet-proofing materials than has ever been conducted outside of Remington UMC laboratories.

It means special paper for the shells; a special formula for the wet-proofing; new equipment invented to apply the wet-proofing compound. Virtually a new type of shell—adding to the shooting qualities of "Arrow" and "Nitro Club" the hitherto unknown quality of perfect resistance to wet.

It produces a shell that can be soaked in water for hours without swelling, and without softening the crimp—a shell that is as bone dry inside after soaking as before—a shell that works perfectly through the gun in all climates, and can be depended upon for sure fire, speed, pattern and penetration, wet days as well as dry.

A shell that you ought to know.
